

**Role: Strategic Services/Security Program Development/Cyber Risk Lead**

**Title: Senior Security Consultant**

**Location** – *Connecticut (Westport-HQ), New York, Boston, Atlanta, Miami, Philadelphia, Dallas, Chicago Los Angeles, San Francisco, Washington DC - (All are possible locations)*

Lodestone Security, is seeking a senior consultant to continue the growth and development of the firm's Strategic Services Practice. As a Senior Security Consultant, you'll be responsible for analyzing risks, identifying areas of exposure, and making recommendations based on that knowledge. You will be advising Business Leaders, CxO's, and Technology professionals. You will also be looked to as an Information Risk & Security expert and be responsible for helping organizations both develop and mature their risk-based information security programs.

The role requires a self-starter who can operate independently through the entire client engagement process, from introduction calls to scoping, interviews and documentation review, to reporting and proofreading. At the end of the day, Lodestone is still very much a start-up. The right individual for the job is going to be ready to roll up their sleeves and do whatever it takes to get the company off the ground. Tenacity and attitude are going to be requirements here, not just nice to haves.

Although this role focuses on Risk Assessments and Security Program Development, you will work hand in hand with our Vulnerability Assessment, Penetration Testing, and Incident Response consultants to provide practical and holistic security guidance for our clients. In addition to client-focused deliverables, you will have responsibilities for developing repeatable methodologies based on industry standards as well as tools for internal practice development to enable Lodestone to capitalize on its unique market position as a subsidiary of Beazley Insurance.

### **About Lodestone:**

Lodestone Security LLC was founded to address the unmet cyber security needs in the Small and Medium Business (SMB) market. In recent years, the SMB market has been victimized by a multitude of cyber security breaches. Lodestone is comprised of security professionals who have worked in the world's top professional services firms and Fortune 500, allowing Lodestone to offer a high level of expertise to its clients.

**Core Requirements:****Essential Duties and Responsibilities include:**

- Ability to successfully interface with clients (internal and external)
- Ability to document and explain technical details in a concise, understandable manner
- Detailed knowledge and expertise leading Risk Assessment related reviews in at least one of the following: CIS Critical Security Controls (SANS Top20), GDPR, HIPAA/HITECH, NIST Cybersecurity Framework, or PCI DSS
- Lead security and risk based discussions, interview business leaders; CEO/CFO/COO etc. as well technical stakeholders; CIO/CISO and their staff
- Performing information risk, security, and related compliance assessments, including testing of related controls
- Developing operational information risk & security programs and related components
- Developing curriculum and conducting training courses in information security risk, security program development, and incident response; (including tabletop exercises)
- Writing clear and concise reports with actionable remediation and practical recommendations for both a business and technical audience
- Conducting or leading research to bolster Lodestone's ability and reputation
- Building of tools, methodologies, and scripts for the team
- Managing projects and staff, and developing/mentoring less experienced staff
- Ability to work independently in a remote capacity

The ideal candidate will come from a professional consulting background or have experience implementing risk management and security programs for SMBs/enterprises, have a desire to deliver excellent client service and have a passion for the profession. The candidate must also feel comfortable working with both technical and business audiences, in the delivery of security and risk management services.

**This role is an ideal match for the following profiles:**

- 1) A Senior Associate from a Security Services Provider or Consultancy who is looking for growth opportunities, to be recognized in the industry, and apply their experiences in a startup/Small Medium Business (SMB) environment and is motivated by delivery and client satisfaction.
- 2) An Experienced Associate or Senior Consultant from an existing "Big 4" firm who is looking for growth potential and the ability to make a difference in the SMB industry and help build a security services practice
- 3) An experienced risk/security professional on a business focused security team looking to broaden their impact in a consulting role.

**Additional Enhancements:**

- Previous experience or willingness to represent Lodestone Security in public forums including security conferences, meetups, and other industry/law enforcement groups.
- An entrepreneurial mindset and willingness and desire to help build a service focused business.
- A desire for their compensation to be correlated directly with their success in the role.
- Knowledge or experience of Incident Response and/or Vulnerability Assessment/Penetration Testing practices and service.

**Desired Skills**

- A self-motivated, detail oriented, independent worker
- Designing and Developing Security Programs including Security Policy & Procedures
- Ability to provide training and perform public speaking and be comfortable in front of an audience
- Develop curriculum and conduct risk assessment related training courses
- GRC process and tools experience a plus
- Strong technical security background across the infrastructure including networking and applications
- Experience participating in application and tools development a plus

**Education & Other Requirements**

- A minimum of three years of experience working in the Information Security industry with a detailed focus on Risk Assessments
- Must be eligible to work indefinitely in the U.S.
- Bachelor's or Master's Degree with a technical focus or in a related discipline or equivalent experience preferred
- CISA, CISM, CRISC certifications a plus

The candidate will not be responsible for “direct sales” – but will be responsible for serving as the information security risk expert in following up on business opportunities derived from their relationship with Beazley and other channels. In addition, the candidate will be encouraged to create an external brand for the business, through activities that could include – conference presentations, industry involvement with both commercial entities and law enforcement, the production of articles and whitepapers, and other external activities, that will help create and reinforce the Lodestone brand and market presence.

**JOB DESCRIPTION**

---

September 25, 2018

The selected candidate will also be expected to support in the recruitment of additional team members corresponding with the growth of the business. In addition they will have a leadership role in developing members of the consulting team.
